Education

Dai Hoc Mo Ha Noi

HOU

Bachelor of Information Technology, Software Engineering. Thesis: Online Ride-Hailing Platform Development

Relevant Coursework: UI/UX Design, Web Design, Web Programming.

Experience

TCOM CORP

Thanh Xuan, Ha Noi

Frontend Developer Intern

Mar 2024 – May 2024

- Collaborated with QA/QC and business teams to analyze requirements, understand fulfillment workflows, and support feature implementation.
- Developed and maintained 10+ reusable UI components using ReactJS, TypeScript, Ant Design, and SASS, improving development efficiency and interface consistency.
- Integrated RESTful APIs using Axios and TanStack Query for data fetching, caching, and state synchronization across multiple screens.
- Resolved 20+ UI bugs and enhancement requests reported by PM and QA teams, ensuring on-time delivery of assigned tasks.
- Participated in GitLab code review processes, incorporating feedback to improve code quality, maintainability, and team collaboration.
- Contributed proposals for UI/UX improvements, helping optimize user interaction flows and interface usability.
- Researched technical documentation and business requirements to investigate project issues and propose feasible solutions.
- Improved task estimation accuracy, sprint progress reporting, and understanding of Agile/Scrum development workflows through active participation in team activities.

Technologies: ReactJS, TypeScript, Ant Design, SASS, TanStack Query, Axios, RESTful API, GitLab, NPM.

Frontend Developer

Aug 2024 – Present

- Maintained and enhanced the Ziraiten platform by integrating Stripe payment services and resolving issues related to pagination, responsive layouts, and bundle optimization.
- Developed core features for the INBID online auction system, including responsive bidding interfaces, real-time updates via WebSocket, order synchronization with Redux Toolkit, and third-party integrations with Instagram, Facebook, and Stripe.
- Built and maintained the CowaTech corporate website using ReactJS, Redux Toolkit, Tailwind CSS, and Bootstrap; implemented REST API integration and role-based access control.
- Developed internal ERP attendance management modules, including timesheets, leave approval workflows, and report export functionality; handled timezone-related edge cases and holiday calculations.
- Designed and implemented task management features for ChaTask, including board views, advanced filtering, and real-time notifications using Socket.IO; leveraged TypeScript and TanStack Query to improve scalability and data management.
- Led development of the sales management module for Festaria CloudMD, implementing order processing workflows, product management (CRUD), inventory synchronization, and multi-step form optimization.
- Built reusable components and shared business logic to improve maintainability and reduce duplicated code across multiple projects.
- Collaborated closely with PM, QA/QC, and backend teams throughout requirement analysis, estimation, development, code review, testing, and deployment processes.

Technologies: ReactJS, TypeScript, Redux Toolkit, TanStack Query, Ant Design, Tailwind CSS, Bootstrap, Socket.IO, WebSocket, Axios, RESTful API, Stripe, GitLab.

Projects

GO-RIDE – Bus Ticket Booking System

May 2026 – Present

- Developed a bus ticket booking platform supporting trip search, seat selection, booking management, and simulated payment workflows.
- Managed booking state using Redux Toolkit and optimized server-state synchronization with TanStack Query.
- Built responsive user interfaces with ReactJS, Ant Design, and SASS.
- Implemented route and date filtering features to improve trip discovery experience.

Technologies: ReactJS, Redux Toolkit, TanStack Query, Ant Design, SASS.

MVL Logistics – Corporate Landing Page

Jun 2026 – Present

- Developed a responsive landing page introducing logistics services, pricing plans, FAQ, and contact features.
- Integrated form validation and API communication using Axios and TanStack Query.
- Applied CSS Modules and SASS for maintainable component-based styling.

Technologies: ReactJS, TanStack Query, Axios, SASS, CSS Modules.

Skills

Frontend: ReactJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS, Bootstrap, Ant Design

State Management: Redux Toolkit, TanStack Query

Backend Integration: RESTful API, Axios, WebSocket, Socket.IO, Stripe Integration

Tools: Git, GitLab, GitHub, NPM, Vite

Methodologies: Agile/Scrum, Code Review, Requirement Analysis, Task Estimation

Languages: Vietnamese (Native), English (Reading Technical Documentation)
